Harvest Operations Corp. (Harvest) is a wholly-owned, subsidiary of Korea National Oil Corporation (KNOC). Harvest is a significant operator in Canada's energy industry offering exposure to exploration, development and production of crude oil and natural gas (Upstream), an oil sands project under construction and development in northern Alberta (BlackGold) and refining and marketing of distillate, gasoline and fuel oil (Downstream) operations.

The BlackGold oil sands project is located approximately 10 km southeast of Conklin, Alberta. BlackGold will utilize SAGD as a proven production technology that uses horizontal drilling and thermal stimulation to maximize energy efficiency and minimize land disturbance.

Opportunity:

The **Control Room Operators – Field/Process/De-oiling (4 Positions)** will report to the Shift Lead and will be responsible for the monitoring and control of the field/process/de-oiling (F/P/D) equipment. The Control Room Operators are responsible for all aspects of the field SAGD production, emulsion processing, and de-oiling. These positions monitor and control unit operating variables utilizing the Honeywell Experion DCS and work closely with the unit operating staff to ensure that all equipment is operating safely, efficiently and in compliance with all applicable legislation.

These are full time employment positions working 12 hours per day, 7 days on and 7 days off. The successful candidates will reside in a full facility camp. Transportation is provided to site from various departure points utilizing a charter air service.

Responsibilities:

- Assist fellow field/process/de-oiling team members to perform their required tasks in order to maintain safe and efficient operations of the BlackGold site facilities
- Ensure all processes and process equipment are operated in accordance with site team's control limits and set points
- Validate compliance with ABSA, AER, OH&S and AESRD directives
- Familiar with and works within the emergency response plan in an emergency situation
- Monitor unit performance indicators
- Work with DCS Lead to ensure that Honeywell Experion control system is operating as designed and programmed and identify improvements to the DCS
- Provide a focal point for troubleshooting, optimization and achieving operation targets to control key costs and improved reliability
- Promote continuous improvement and consistency within the operating units with regards to operating practices and work quality
- Accurate and timely reporting of operation data and all incident reports
- Participate in the development of SOP's, lock-out tag outs, safety bypass procedures and safe work permits
- Provide input to employee performance reviews and staff development
- Maintain all required safety certification and regulatory courses

Qualifications:

- Minimum Third Class Power Engineering Certification
- Second Class Power Engineering Certification is an asset or the ability to acquire Second Class by May 2014

- Graduate from a Power Engineering, Chemical Processing or Petroleum Engineering Technology Diploma program is an asset
- Minimum 7 years operations experience
- A strong understanding of and experience in an operating field SAGD production, emulsion processing and de-oiling water treatment is desired
- Minimum 3 years experience as a DCS Control Room Operator
- Honeywell Experion experience is an asset
- An understanding of packaged steam boilers, vapor compressor evaporators and utilities systems (glycol heaters, air compressors, emergency generators, raw water treatment) is an asset
- Familiar with facility drawings and specifications
- CSU experience is an asset
- Team player with strong leadership, mentorship and communication skills
- Committed to best practices in health, safety and environmental management
- Ethical business conduct and community responsibility
- Self –motivated, open-minded and results oriented
- Strong Computer Skills are required
- Valid Class 5 Driver's License

Compensation Package:

- Competitive Base Salary
- Savings Plan
- Short and Long Term Incentives
- Health Benefits
- Travel Allowance
- Camp Allowance
- Company Sponsored Fly-in/Fly-out Program
- Apartment Style Camp Accommodations
- Work schedule that supports work-life balance
